

[/ About Us](#) / [Airband Profile](#)

Leading the Fixed Wireless Revolution

Airband Communications is the largest fixed wireless provider serving businesses in the United States. We deliver a comprehensive portfolio of high-bandwidth Internet access, point-to-point private line services and managed solutions over one of the industry's most scalable last-mile networks.

Founded in 2000, Airband built its wholly-owned network to bypass the local phone and cable companies, providing customers with faster install times, unmatched scalability and complete path redundancy from the traditional wireline infrastructure. Today, Airband provides service in 17 markets and is expanding quickly.

Airband is managed by a senior leadership team that is focused on providing an exceptional customer experience for every single customer. Our employees are passionate about delivering the results businesses are looking for. At Airband, we're known and respected for our local support staff, exemplary service and customer responsiveness. We are proud to serve thousands of businesses nationwide.
